In response, the OHSEP Director stated that the lots being proposed are in non-compliance. He stated that there are several routes to take by the Jury; label the lots not for development so any buyer/seller has already stipulated they understand no development on the lots. He then stated that it can be developed and meet the Parish standards. Committee member Jamie Ponville explained what was currently there and stated that the trailer park was approved and accepted by the Police Jury. The OHSEP Director also explained that the property met the Parish subdivision standards and they agreed to maintain the aggregate street to comply. He then stated that there are lots being developed on the gravel street that doesn't comply with the ordinance. He further stated that it's the developer's responsibility to develop it to the Parish standards and the Parish would then accept into the system if it complies. A brief discussion was then held regarding the ordinance standards. The OHSEP Director explained the Rebecca Road situation. The ADA added that this is a good example indicating why the variance shouldn't be granted. Chairman Irving Comeaux presented a situation that occurred in Bayou L'Ourse and stated the importance of following the ordinance. Following a discussion regarding the ordinance, the OHSEP Director suggested that the committee not consider changing the ordinance because many people followed the regulations when developing.

two (2) associated vendors and received only one quote (1). He stated that he is awaiting the second quote but is currently scheduling a date to meet with a 3rd contractor but it hasn't been done because the project is not complete and the approval for pricing has not been received. Committee member Leroy Blanchard proceeded with an update on the dredging stating that the Port of St. Mary received \$33 million in funding on top of the \$16 million in funding from last year. This is the 1st time since 2011 to have a full channel in the Atchafalaya River from Morgan City. The flow level for the river has increased 400% from where it was last year which means the water will be lower in the Atchafalaya River at the mouth of Bayou Chene so we can expect less back water flooding.
12. Chairman Irving Comeaux recognized the OHSEP Director, who stated that he provided everyone with a copy of the resolution adopting the 2021 Assumption Parish Multi-Jurisdiction Hazard Mitigation Plan. He stated that this is all in process and parish approval as well as the Village of Napoleonville is needed. 15. The OHSEP Director then stated that the Generator Projects – ARCO continues to do load testing of the different sites. There are some sites that problems are occurring with the generators that have been sitting there for several years. The warranty work that ARCO has to do on the generators range from needing starters, all pressure release valves, etc. He stated that 5 generators have been completely load tested and are ready to go. The Parish Engineer added that the contractor has been made aware of the adjustments that are needed to the gas lines and he is lining up a crew to have it done.

The state sent a new Cooperative Endeavor Agreement that will be presented at the next meeting for the execution. He presented it to the ADA and the Waterworks for their review. Once reviewed and approved by both parties it will be presented for the Police Jury President to sign. He further stated that phase 1 is completed and a request to GOHSEP and FEMA have been made for the funding to start phase 2, the construction. He mentioned that this is a big concern due to the cost of material that has skyrocketed.
